An incredibly wonderful ebook with lucid and perfect answers. It is written in easy words instead of difficult to understand. It has been printed in an exceptionally easy way in fact it is simply following. I finished reading this publication in which it really modified me, modified the way I think.

Excerpt: . . . 11 nesota, with 52 facilities in 21 States, including the States of Utah and Wisconsin. Given our large number of facilities spread across the country, our company has an overarching interest in the com-petitive transportation environment in general, including via rail. ATK strongly supports S. 772, the Railroad Antitrust Enforce-ment Act. If S. 772 had been the law of the land over the last few decades, we would see a more competitive rail industry today, with fewer of the problems that I am here to discuss. Today I will ad-dress our captive customer status at two of our facilities. The first is ATKs Launch Systems facility near Promontory, Utah, a private facility that supplies large solid rocket boosters for NASAs Space Shuttle program, the Department of Defenses Minuteman and Tri-dent strategic missile systems, and other large defense, commercial, and civil rocket programs. The second is the Armys Radford Army Ammunition Plant, which ATK operates under a Govern-ment-owned, contractor-operated agreement with the U. S. Army. ATKs Promontory facility is a captive customer of the Union Pa-cific Railroad. The solid rocket motors manufactured here are load-ed by ATK onto railcars at our facility in Corinne, Utah. Union Pa-cific then transports the solid rockets to Titusville, Florida, among other locations. Because of the enormous size of most of these rock-et motors, there is no other way to ship these products. In recent years, Union Pacific has instituted substantial price in-creases. In 2002, ATK Promontory paid...
