ANTIMONY, GRAPHITE, NICKEL, POTASH, STRONTIUM, TIN (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Antimony, Graphite, Nickel, Potash, Strontium, Tin It has been the desire and aim in this work to get the information into the hands of those most interested and likely to be benefited, as quickly as possible, and in a practical rather than scientific form. For the benefit of the buyers or consumers of the ores, lists of owners of properties and the location of the same are herewith presented in connection with each mineral dealt with. These lists have. Been kept up to date as far as possible, but it must be borne in mind that the activities in many of the mineral industries have increased at such a rapid rate, especially during the last year that new properties are constantly being developed, so that by the time this report is in the hands of the reader, there will, no doubt, be additions to these lists. It will be appreciated if those who have recently discovered or undertaken the development of new properties, will inform this Bureau of the fact, so that. A record may be kept of the same for the benefit of all concerned. In order to get equally valuable information for the producers, an endeavor has been made to list all the buyers and consumers of which this office had record. But here, also, as in the case of the producers, it must be stated that such lists are constantly being added to, or changed. It is to be hoped that. Those whose names do not appear, or who have not been consulted in this regard, will inform this Bureau of the fact if they are in the market for any of the minerals dealt with,...
