

Mangroves of Sabah - an introduction to the Flora and Fauna

Filesize: 4.69 MB

Reviews

It is fantastic and great. It is written in easy words and phrases instead of confusing. I am just delighted to explain how this is actually the best book I have got read through during my individual life and might be the finest publication for ever.
(Prof. Murl Shanahan DDS)

MANGROVES OF SABAH - AN INTRODUCTION TO THE FLORA AND FAUNA

Sabah Forestry Department, Sandakan, Sabah, 2010. Paperback. Book Condition: New. First Edition. Very well illustrated, pp 151, paperback in pictorial card covers, a very good copy. . [To the casual eye, mangroves do not look like any other forests, but they thrive in this amphibious environment. Every living being is a product of the environment, moulded by intricate events throughout its evolutionary history. Nature endows mangrove communities with ingenious adaptations for success. As such, many associated life forms have found a niche in the mangroves. Of the 340,000 hectares of mangroves in Sabah , over 90% are still largely intact, and most of these areas are under Sabah Forestry Department. Realizing that mangroves are important natural resources, efforts have been made to manage them in accordance with the principles of conservation and sustainable use.].
