Pages Number: 342 Publisher: Xi'an Electronic Science and Technology Pub. Date :2011-03-01 version 3. Yuanjia Zheng editor of Computer Networks (3rd edition) is a general higher education. Eleventh Five-Year national planning materials. was published in 2001. colleges and universities teaching computer network. the third edition. Compared with the previous two editions of the third edition. by deleting the outdated content. an increase of the latest network technology. The book mainly from the network infrastructure. network design and system integration. network management system installation and maintenance. network security. network applications and integrated application and experimental aspects of training. six write. the proportion of all aspects of intellectual content: 30% of network theory knowledge. 10% of the popular network of technical features. 60% of network design. operation and maintenance. security. and application of knowledge. Computer Networks (3rd edition) After the introduction of some basic knowledge of network theory at the same time. highlighting the technical characteristics of the network applications and network engineering construction and other aspects. Focus on practical preparation of content. from the start leads to a specific instance of the concept of the network. so that the concept clear and understandable. The book has a lot of network engineering examples and illustrations. content. realities. in layman's language; the same time the beginning of each chapter has introduced the concept. and finally summarized. along with a large number of exercises. but also increased the engineering and innovation exercises . To improve students' practical ability. in particular. added a chapter experimental training content. Book is especially suitable for general higher education. adult colleges and private colleges and other undergraduate computer-related majors. computer applications. non-computer science undergraduates may also be used. but..
