Brand New Book ***** Print on Demand *****.Excerpt from Transactions, Vol. 10: Of the Eighteenth and Nineteenth Annual Meeting of the Kansas Academy of Science, 1856-86, With the Reports of the Secretary That the track is probably that of a right foot rather than a left, is indicated by the wider separation of the outer toe from the middle toe, resulting from the greater versatility of the outer toe as compared with the inner toe - a character illustrated in many families of existing birds, and carried to an extreme in the cuckoos and the woodpeckers, in which the outer anterior toe is entirely reversed in its direction and becomes a backward-pointing member. It will be seen from the accompanying cut that our bird-track exhibits the imprint of all four of the toes. The outer anterior toe is represented for fully two-thirds of its length. The middle and inner anterior toes are entirely impressed, even to the claws at their extremities - the claw being very distinctly marked upon the middle toe. The ball of the foot has left a deep impression, and the...
