

## Novel multi-target therapies for neurodegenerative diseases treatment

Filesize: 9.59 MB

### **Reviews**

*A very amazing publication with perfect and lucid information. We have read through and that i am certain that i will planning to study once more yet again in the future. You will not really feel monotony at anytime of the time (that's what catalogues are for about should you question me).*

## NOVEL MULTI-TARGET THERAPIES FOR NEURODEGENERATIVE DISEASES TREATMENT

To read **Novel multi-target therapies for neurodegenerative diseases treatment** eBook, remember to refer to the button listed below and download the ebook or gain access to additional information that are have conjunction with NOVEL MULTI-TARGET THERAPIES FOR NEURODEGENERATIVE DISEASES TREATMENT book.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The neuroprotective activity of novel multi-functional iron chelators in experimental models of AD, ALS and aging | Due to the complex pathophysiology of neurodegenerative diseases, an innovative approach towards neuroprotection or neurorestoration may be the development of multifunctional pharmaceuticals. Such drugs target an array of pathological pathways, each of which is believed to contribute to the cascades that ultimately lead to neuronal cell death. To date, Professor Youdim and our research group are designing pluripotential non-toxic, brain-permeable iron-chelating drug candidates possessing diverse pharmacological properties that can act on multiple targets and pathological features ascribed to Parkinson&apos;s disease, Alzheimer&apos;s disease (AD) and amyotrophic lateral sclerosis (ALS). The aim of my PhD thesis was to examine the potential therapeutic utility of these novel multi-target drugs in the treatment of AD, aged-related cognitive decline and ALS. This book discusses the multiple effects of these compounds, concerning their neuroprotective/neurorestorative molecular mechanisms in vivo and in vitro, including antioxidant and iron chelating activities, monoamine oxidase inhibition, and regulation of pro-survival signaling pathways, cell cycle and neurite outgrowth. | Format: Paperback | Language/Sprache: english | 140 pp.
