Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from The University Studies, Vol. 10: Of the University of Nebraska We may conceive the blue point as in a plane of imaginaries in which the origin of coordinates is over (x, y) . Similarly, Maxwell has superposed a velocity diagram upon a position diagram, and upon that an acceleration diagram. It will sometimes be convenient to speak of a black-vector from the origin to the blackpoint from which the red vector begins. Though the vector is understood to be always straight the line which represents it may for convenience be drawn curved. It is essential merely that it go from the proper beginning to the proper end. 2. The coordinates are merely the projections of the vector upon the axes. We can change to new axes rectangular or oblique, leaving the red vector unchanged. We can make the coordinates homogeneous. We can extend the method to space coordinates. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
