Actual constructions in the manual training department will mean more than any drawing that is copied from a picture. A visit to a building to study architectural form not only adds an interest but develops the sense of the beautiful in geometrical construction and a love for symmetry. Girls find equally as much interest in arrangement of house furnishings, designs of wall paper, window and mural decorations. All of this stirs up an interest and a love for the subject, and the scope of geometry is widened. If from time to time brief historical data is given it adds human interest. For9 a class just entering geometry a small equipment of ruler, compasses, scissors, drawing board, protractor, parallel ruler, squared paper, T-square and a triangle of 60 and of 30 degrees with a right angle should be provided for each pupil. In addition there should be accessible to the pupil at all times prisms, pyramids, cylinders, cones, drawing instruments, pasteboard for construction, sand for testing capacity, a trip balance, and anything else that would be of value locally, or that might be a help to the child to associate the new idea with his former experiences. 8J.
