Many western governments have done large amounts of analysis of food composition. But the results of their work have not proven to be very accessible to the public. Some commercial websites have attempted reasonably successfully to make the food composition databases more accessible. But there was a lot of work to be done in rewording the food names in order to make the data usable and useful to the general public in book form. This reference book is based upon the UK government composition of foods integrated data set (CoFID McChance and Widdowson March 25th 2015).
