Thames Hudson Ltd, United Kingdom, 2017. Hardback. Condition: New. Language: English . Brand New Book. Gathering together the world's leading experts on vernacular architecture, this once-in-a-generation publication examines how local buildings have stood the test of time and offer vital lessons for the future. The core of the book is arranged by climate zone, from desert to tropical, temperate to arctic. Within each section, buildings are presented regionally, showing how local climatic conditions and vegetation affect the evolution of building styles. This central part is bookended by a range of essays exploring the economic and anthropological aspects, while the reference section offers information on materials science and engineering, including how buildings have been adapted to contend with natural disasters. With the growing challenge of climate change, there has never been a more important time to understand how to make the best use of local natural resources and create buildings that do not rely on stripping our planet or transporting materials across the globe. This book shows us how.
