Excerpt from Proceedings of the Third Ussa-USSR Symposium on the Effects of Pollutants Upon Aquatic Ecosystems The Joint us-ussr Agreement on Cooperation in the Field of Environmental Protection was established in May of 1972. These proceedings result from one of the projects, Project -13, Effects of Pollutants Upon Aquatic Ecosystems and Permissible Levels of Pollution. As knowledge related to fate and transport of pollutants has grown, it has become increasingly apparent that local and even national approaches to solving pollution problems are insufficient. Not only are the problems themselves frequently international, but an understanding of alternate methodological approaches to the problem can avoid needless duplication of efforts. This expansion of interest from local and national represents a logical and natural maturation from the provincial to a global concern for the environment. In general, mankind is faced with very similar environmental problems regardless of the national of political boundaries which we have erected. While the problems may vary slightly in type or degree, the fundamental and underlying factors are remarkably similar. It is not surprising, therefore, that the interests and concerns of...
