Dover Publications Inc., United States, 2018. Paperback. Condition: New. Language: English . Brand New Book. All men by nature are actuated with the desire of knowledge, declared Aristotle. The philosopher s works are foundational to the history of science, and his treatise on metaphysics, or first philosophy, is divided into sections of previous philosophical thought and theories; a refutation of skepticism; a demonstration of God s existence; an examination of the relation of metaphysics to the other sciences; an elucidation of the nature of the infinite; and other major philosophical issues. The central theme consists of an inquiry into how substance may be defined as a category of being. The philosopher describes substance as both formal and material reality, and he discusses the relation between potentiality and actuality. An excellent example of Aristotle s dialectical method, which reasons from reliable opinions rather than known truths, this work offers a fine introduction to classical metaphysics.
