It becomes an awesome publication that I actually have actually read. It really is written in simple terms and not difficult to understand. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Potomac Books Inc, United States, 2013. Hardback. Condition: New. Language: English . Brand New Book. After the September 11 attacks, the 9/11 Commission argued that the United States needed a powerful leader, a spymaster, to forge the scattered intelligence bureaucracies into a singular enterprise to vanquish America's new enemies - stateless international terrorists. In the midst of the 2004 presidential election, Congress and the president remade the post-World War II national security infrastructure in less than five months, creating the Office of the Director of National Intelligence (DNI) and a National Counterterrorism Center (NCTC). *Blinking Red* illuminates the complicated history of the bureaucratic efforts to reform America's national security after the intelligence failures of 9/11 and Iraq's missing weapons of mass destruction, explaining how the NSC and Congress shaped the U.S. response to the 9/11 attacks. Michael Allen asserts that the process of creating the DNI position and the NCTC is a case study in power politics and institutional reform. By bringing to light the legislative transactions and political wrangling during the reform of the intelligence community, Allen helps us understand why the effectiveness of these institutional changes is still in question.
