To save **The Messenger of Mathematics Volume 19** PDF, make sure you refer to the hyperlink listed below and download the ebook or have access to other information that are have conjunction with THE MESSENGER OF MATHEMATICS VOLUME 19 book.

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 edition. Excerpt: .for v from this equation in the expressions for $\int c -re, r -$ r , we can express the potential energy in terms of $u, w,$ and $a,$ and the virtual moments of the acceleration can be expressed in terms of the same quantities. The use of Lagrange s method then leads to the general equations of motion. We shall apply this to the case of a circular helix. Calling V the potential energy of the wire, we have, for the variation of this, The part of the virtual moments due to acceleration is $mf(i3u] 530 + ibdw) ds.$ and, after substituting from the last equation in the first two eliminate $A, B, G,$ we get the determinantal equation $3 7 l 2 2 1$ from which we can see that there are two kinds of waves of given length which travel with different velocities. When the helix is of small pitch the natures of the two are very different. For, if we neglect $r,$ the equations separate into the two sets Consequently there will be one wave which will appear as a progressive contraction of the radius of the helix, and whose velocity will be given by $L l r n l 11 m /c n$ and another wave which will appear as a crowding of the successive turns of the helix, and whose velocity will be Vibrations of a circular ring. The equations we have written down for the case $r=0$ are clearly...
