Jaypee Brothers Medical Publishers (P) Ltd., 2014. Softcover. Condition: New. First edition. Children have the highest incidence of epilepsy compared to any other age category. Positron emission tomography (PET) and single photon emission computed tomography (SPECT) scans, SISCO, functional magnetic resonance imaging (fMRI) and magnetoencephalography are coming slowly into clinical use. While clinicians are still coming to terms with the indications and adverse effects of newer drugs such as topiramate, lamotrigine, zonisamide, lacosamide, levetiracetam and brivaracetam, new side effects such as blue skin discoloration with retigabine are being reported. Alternative therapy for refractory epilepsy such as the ketogenic diet and epilepsy surgery has also made small determined steps in India. Pediatricians need to keep abreast of current literature in pediatric epilepsy. This book is a small attempt in that direction. Pediatric neurologists from around the country have contributed to compile a comprehensive book...
