

## Bio-inspired Optimization Methods : modeling, design, inverse problem and robust optimization of a representative mechanical system

Filesize: 9.03 MB

### **Reviews**

*This pdf is worth buying. It is actually written in basic words and not confusing. It has been printed in a remarkably basic way in fact it is merely following. I finished reading this publication through which really altered me, affect the way I really believe.*

LAP Lambert Academic Publishing Dez 2015, 2015. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - In this book the development of multi-objective optimization strategies based on the bio-inspired optimization algorithms (Bees Colony Algorithm, Firefly Colony Algorithm and Fish Swarm Algorithm) in association with two particular operators, i.e., the Pareto Dominance Criterion and the Crowding Distance Operator is presented. The proposed methodology is applied to optimal design of a two degree-of-freedom nonlinear damped system constituted of a primary mass attached to the ground by a linear spring and the secondary mass attached to the primary system by a nonlinear spring. In addition, the solution of an inverse problem and the robust optimization problem are also addressed. 80 pp. Englisch.
