Thermo-Nuclear Demolition is a documentary about America s nuclear history, the political psychopathy in Washington, and the loss of civil liberties promoting a fascist State. The demolition of the extremely solid and massive steel construction of the World Trade Center on September 11, 2001 is explained in detail by an anonymous Finnish Military Expert who compares the World Trade Center on 9-11 with a virtual nuclear blast site, supported by photographic evidence, the typical phenomena, as well as a documentation of precedents for political expediencies including the Pearl Harbor cover-up, the decisions that led to the use of the atomic bomb against Japan, and the subsequent development of clean directional mini-hydrogen bombs.
