Taylor Francis Inc, United States, 2014. Hardback. Condition: New. Language: English . Brand New Book. MIMO Processing for 4G and Beyond: Fundamentals and Evolution offers a cutting-edge look at multiple-input multiple-output (MIMO) signal processing, namely its detection (in both time and frequency domains) and precoding. It examines its integration with OFDM, UWB, and CDMA, along with the impact of these combinations at the system level. Massive MIMO and network coding at the physical layer are very recent topics which are also addressed, and which are expected to play an important role in 5G systems.The book brings together contributing authors from first-class institutions who have been working in international research and development (RD) projects and are highly cited in the MIMO field. These experts examine ongoing RD activities in the field of MIMO systems and its associated signal processing that is expected to be employed in 4G and 5G systems. Covers the various wireless communication standards that make use of MIMO systemsExplains the receiver processing associated with MIMO signal detection (including the case of massive MIMO systems) and presents the optimal precoding techniquesConsiders optimized MIMO schemes and processing for block transmission techniques, for orthogonal frequency division multiplexing (OFDM) transmission techniques, and for single carrier-frequency domain equalizationExamines MIMO processing and optimization for wideband code division multiple access (WCDMA)Describes the ultra-wideband (UWB) transmission technique and the corresponding MIMO processing and optimizationsExplains physical layer network coding techniques From basic receiver design to more advanced processing, the book covers the spectrum of topics associated with MIMO systems and MIMO processing. It provides a comprehensive description of MIMO fundamentals and theory that is ideal for anyone looking to sharpen their skills on the subject, such as corporate/industrial employees or graduate students.The book summarizes the most important enhancements related to the processing of MIMO systems for 4G...
