Reviews

Extremely helpful for all class of folks. It is really simplified but excitement from the 50 percent of your ebook. You wont sense monotony at any moment of your time (that's what catalogs are for about if you check with me).

Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Financial technology innovation has exploded in the popular consciousness, and promises a radical transformation of the global financial services industry. Over \$20 billion is expected to be invested in fintech projects in 2016. How can executives, investors, and entrepreneurs make sense of the new inventions that are driving this change? MIT Professor Alex "Sandy" Pentland, called by Forbes one of the seven most powerful data scientists on the planet, is joined by fintech intrapreneur and educator David Shrier in curating an exploration of several major trends and technologies that are changing the face of financial services. Coauthors include Deven Sharma, the former President of SP, and Alex Lipton, the former head of quantitative analytics for Bank of America Merrill Lynch. From blockchain to artificial intelligence, this series of articles helps the reader grapple with this exciting area of technology innovation.
