The ebook is easy to go through and easier to recognize. We have studied it and I am certain that I will plan to read through it once again in the future. I am quickly getting a pleasure from studying a composed publication.

Cranbrook Institute of Science, United States, 2007. Paperback. Condition: New. Language: English . Brand New Book. An Upper Great Lakes Archaeological Odyssey celebrates the career of Charles E. Cleland-Michigan State University emeritus professor and curator of anthropology-through a series of focused research papers by a distinguished sample of his friends, colleagues, and former students. All ten papers touch on some aspect of Cleland s thirty-five years of research into the past and present of the indigenous peoples of the Upper Great Lakes. Collectively, these contributions demonstrate the rich diversity of both Cleland s research interests as well as the innovative directions of contemporary archaeology in the Great Lakes region. Jim Harrison, noted author and Cleland aficionado, provides a dedication for the volume. What follows is a historical tribute to the career of Charles Cleland, emphasizing his many contributions to the archaeology of the Upper Great Lakes and his profession, as well as his pioneering interactions with Indian peoples. Consequently, the chapters geographically span a generous area of the Upper Great Lakes region, ranging from Illinois and Wisconsin through both peninsulas of Michigan and into Ontario. Casting a broad net, the topics covered by the thirteen contributors span from two thousand years ago to the present, taking new approaches to old problems and providing exciting insights into their evolution and current status. With a new eye and the advantage of hindsight, some authors revisit Cleland s old research haunts, such as the chapters on the Canadian/Carolinian transition zone, the origins of the Great Lakes inland shore fishery, the Late Woodland Heins Creek site, northern ridged field agriculture, and the fur trade archaeology of Fort Michilimackinac. Other topics reveal innovative research into broader issues of historical archaeology, mortuary analysis, subsistence practice at a Mesquakie Fort and the taphonomy of riverine urban environments....
