Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Life: Its Nature, Varieties, and Phenomena The object of this work is two-fold. First, it is proposed to give a popular account of the phenomena which indicate the presence of that mysterious, sustaining force we denominate Life, or Vitality, and of the laws which appear to govern their manifestation; secondly, will be considered those Spiritual, or Emotional and Intellectual States, which collectively constitute the essential history of our temporal lives, rendering existence either pleasurable or painful. The inquiry will thus embrace all the most interesting and instructive subjects alike of physiology and psychology; the constitution and functions of the bodies in which we dwell; the delights which attend the exercise of the intellect and the affections; the glory and loveliness of the works of God, - will all come under notice, and receive their fitting meed of illustration. Especially will the practical value and interest of life be pointed out; the unity and fine symmetry of the True, the Beautiful, and the Good; the poetry of common things, and the intimate dependence of the whole upon Him in whom we live, and move, and have our being. Man, as the noblest recipient, upon earth, of the divine life, will naturally be the principal object of consideration; not, however, the only one. Seeing that he is the Archetype of the entire system of living things, the principles of a true doctrine concerning him become the principles of Natural History in every one of its departments. Animals, plants, even the inorganic world of minerals. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of...
