Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Foreign Agriculture, Vol. 3: Including Foreign Crops and Markets; March 29, 1965 For generations, many Americans thought of Africa as the Dark Continent. Their geographies taught them that it was bounded on the north by the Great Sahara Desert but that the heart of the world's largest land mass was deep jungle, peopled by pygmies and warring tribes who made life um comfortable for missionaries, explorers, and big game hunters. Though somewhat erroneous, this image lasted nearly up to World War II. Today America's interests in Africa have been broadened by the rapid political changes taking place there, particularly the emergence of many new Afri can nations. Most Americans now are concerned about what the United States can do to help Africa develop stable nations able to make their own unique contributions to the world community. They want to know what can be done to further the legitimate aspirations of the Africans for a better life. Also, American farmers and businessmen are interested in what this great continent offers as a possible market.
