Excerpt from Physical Properties of the Principal Commercial Limestones Used for Building Construction in the United States Physical data contained in Tables 2 to 14 were determined in the laboratories of the Bureau of Standards on samples submitted by the various producers of limestone. The greater portion of the chemical data and information relating to the quarry regions were obtained from State geological reports and other available sources. Range values cited for various physical properties on different types of natural stone were taken from the journals or wherever the information could be found, and many of these relate to materials from foreign countries. Lists of buildings exemplifying the use of the various limestones were supplied by the producers and supplemented as far as possible by references in the trade journals, State reports, etc. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
