In these tough economic times, most of the people are going for hobbies those can be done at home inexpensively as well as in a reasonable amount of time. Brewing fits the bill, as it does not require a huge investment in time or capital, and is great to enjoy with friends. Brewing is the process of making beer, basically a fermented, alcoholic beverage made of grains. One of the most commonly used grains for brewing is barley, whereas others include rye, wheat, sorghum and oats. More or less, brewing is similar to making wine, a fermented alcoholic beverage made of fruits (usually grapes) or mead (fermented honey). Nonetheless, the brewing has its own unique elements as well. To home-brew a beer, whether extract or all-grain, it requires, first and foremost, sound understanding of the process as well as mastery over the brewing techniques. If you can boil water and stir, you are ready to brew beer. Yes! You can brew your own beer with little efforts and a fraction of the cost of commercial beer.
