RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 66 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1911 edition. Excerpt: . . . Co. which has recently been completed, displays some examples of excellent paper mill engineering. On account of its unprecedented size, the plant presented some difficult problems in design and construction which were ably met by the engineers and by the manufacturers of the various parts of the equipment. The conveyors are said to be the largest of this type that have ever been constructed and their success, here, has brought several requests for information regarding them. A description of the salient features of their construction may, therefore, be of considerable interest, taking up both the special details of construction and, also, the general arrangement of the conveyor system with respect to the entire plant. Seven drag conveyors constitute the system, these being used to convey the straw from the sheds to the rotary cookers, from the rotarys to the cooked stock room and from there to the heaters. The conveyors are all of the same general construction, the differences being merely in the width of some of the conveyor troughs and in the details of the drives. In order that the material carried will pile up in the center of the trough and not accumulate on the chains, beveled oak blocks are arranged along the sides of the trough directly above the chains. At the points along the conveyor where the trough rises from the horizontal, these blocks are lined on the under side...
