RE-EMERGENCE: LOCATING CONSCIOUS PROPERTIES IN A MATERIAL WORLD (HARDBACK)**DOWNLOAD**

MIT Press Ltd, United States, 2011. Hardback. Condition: New. Language: English . Brand New Book. A philosopher offers a non-physicalist theory of mind, revisiting and defending a key doctrine of emergentism. The presence of sentience in a basically material reality is among the mysteries of existence. Many philosophers of mind argue that conscious states and properties are nothing beyond the matter that brings them about. Finding these arguments less than satisfactory, Gerald Vision offers a nonphysicalist theory of mind. Revisiting and defending a key doctrine of the once widely accepted school of philosophy known as emergentism, Vision proposes that conscious states are emergents, although they depend for their existence on their material bases. Although many previous emergentist theories have been decisively undermined, Vision argues that emergent options are still viable on some issues. In *Re-Emergence* he explores the question of conscious properties arising from brute, unthinking matter, making the case that there is no equally plausible non-emergent alternative. Vision defends emergentism even while conceding that conscious properties and states are realized by or strongly supervene on the physical. He argues, however, that conscious properties cannot be reduced to, identified with, or given the right kind of materialist explanation in terms of the physical reality on which they depend. Rather than use emergentism simply to assail the current physicalist orthodoxy, Vision views emergentism as a contribution to understanding conscious aspects. After describing and defending his version of emergentism, Vision reviews several varieties of physicalism and near-physicalism, finding that his emergent theory does a better job of coming to grips with these phenomena.
