**MONTHLY NOTICES OF THE ROYAL ASTRONOMICAL SOCIETY VOLUME 49**

To download **Monthly notices of the Royal Astronomical Society Volume 49** PDF, you should access the button listed below and save the document or have accessibility to other information which are have conjunction with MONTHLY NOTICES OF THE ROYAL ASTRONOMICAL SOCIETY VOLUME 49 ebook.

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 126 pages. Dimensions: 9.7in. x 7.4in. x 0.3in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1889 Excerpt: . . . in comets at aphelion and planetary nebulae, the spectra are identical, consisting simply of magnesium radiation (X 500). With the first increase of temperature continuous spectrum is added in both cases. As the nebulous swarm condenses, an apparent star, with a spectrum consisting of bright fluting and lines, is the result, and this is also the case in cometary swarms. Still further condensation of the nebulous swarm results in a body of Group II. giving mixed carbon radiation and metallic fluting absorption; and this, also, is a well-marked stage in the development of cometary spectra. Further condensation in both cases results in line absorption. Schiaparelli's view, therefore, that comets consist of nebulous materials drawn into the solar system by solar attraction, is now abundantly demonstrated by the spectroscopic study of nebulae and comets. The discussion of cometary spectra, therefore, strengthens the general hypothesis, which would have been worthless had the cometary spectra been otherwise. In the second part of this paper Mr. Lockyer proceeds to test his hypothesis by a discussion of the spectrum of the aurora. He points out that if in the aurora the solid particles of the meteorites, which are constantly entering our atmosphere, are acted upon by the electric current the spectroscopic phenomena observed ought to be similar to those observed in our laboratories when meteoric dust is subjected to electric discharges in vacuum tubes. It has never been possible to reconcile the aurora spectrum with any known spectrum of air,...
