The inspector can only prove such practice by removing or slacking off a cap here or there about the house if he suspects such an attempt. If no air escapes, then he has the dead end. WILL BOILING DRINKING-WATER PURIFY IT? Q. Will you please tell me if boiling well-water will purify it perfectly, so that we can safely drink it, or is it necessary to filter it also? A. The boiling of water will purify it so far as living organisms are concerned, and would probably make harmless water contaminated by cholera or typhoid fever discharges. It would not remove any mineral poisons which might be present in the water, and it is uncertain as to the effect which it would have on certain poisonous substances analagous to strychnine, which are sometimes produced in organic matters by minute organisms. In other words, the destruction of the life of the germs might not necessarily destroy all of their dangerous products. After boiling, filtration would only be needed in case a cloudiness had been produced in the water, and, as a rule, it is not desirable on account of the risk of contaminating the water by the filter itself, unless this last is quite new. DIFFERENTIAL RAM FOR TESTING FITTINGS. On a recent visit to the workshops of the Boston Water-Works, on Federal Street, our attention was called to an apparatus for testing valves and fittings to...
