RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 44 pages. Original publisher: Emmitsburg, Md. : Federal Emergency Management Agency, U. S. Fire Administration, National Fire Data Center, 1991 OCLC Number: (OCoLC)71341010 Subject: Nursing homes -- Fires and fire prevention -- Alabama -- Bessemer. Excerpt: . . . 5 USFA-TR-043 September 1990 The fact that the structure did not fully comply with NFPA 21 regarding designed egress routes was a critical factor for those residents having the fire between their rooms and the exit. Their escape routes from their room doors would have taken them directly through the area of the fire. The windows in their rooms were so high that it would have been extremely difficult for the residents to escape through them. It was also felt that lateral spread of the fire was escalated by a hole in the hall ceiling where an attic fan had been installed. It is estimated by the Fire Department that alarm notification may have been delayed as much as eight minutes while the son of a staff member was evacuating the residents. This is not to say that what he did was wrong. It is felt by some that...

### Reviews

*The ebook is simple in go through better to fully grasp. It is actually rally exciting through reading through period. It is extremely difficult to leave it before concluding, once you begin to read the book.*
