RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 30 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1899 edition. Excerpt: . . . the armature may be. For instance, assuming the brushes D, Di stationary and the armature turning; if the armature has turned so far around that segment 2 would be under the brush D, then segment 6 would be under brush Di. The current would go to the armature winding through b and leave it by way of f. In this way each one of the segments and connecting wires has to perform in succession its work. The current in going around the core makes a magnet out of the iron, as indicated by the letters N, S. For the sake of convenience in understanding, the armature core may be also considered divided into two half rings, as in Fig. 44, the upper and the lower; then the current flowing around the upper half makes it a magnet, and simi FIG. 44. larly the current in the lower half will make that half become a magnet. The poles are marked N and S. The poles caused by each half of the current are indicated on the ring. An N pole on one side and an S pole on the opposite side in each half is produced, and both together make again one N pole and one S pole, but of double the strength. As long as the brushes stand in this position the magnetic poles will stay in space in the same position, however much the armature may rotate, because just as many turns are...
