Energy Harvesting

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Energy harvesting from ambient wasteful energies for the purpose of running low-powered electronics has emerged during the last decade as an enabling technology for wireless applications. The goal of this technology is to provide remote sources of electric power and/or to recharge storage devices, such as batteries and capacitors. The concept has ecological ramifications in reducing the chemical waste produced by replacing batteries and potential monetary gains by reducing maintenance costs. The...
