LARGE-SCALE IMPRINTING OF SILVER SUBMICROMETER STRUCTURES

Large-scale imprinting of silver submicrometer structures
Technique for producing high-resolution metal microstructures and studies of their optical and mechanical properties

Südwestdeutscher Verlag Für Hochschulschriften AG Co. KG Jul 2015, 2015. Taschenbuch. Book Condition: Neu. 220x150x7 mm. This item is printed on demand - Print on Demand Neuware - While metals are extremely widespread in the macroscopic world, the use of metallic microstructures is currently limited by the deficiency of efficient fabrication techniques and the incomplete understanding of the material properties at submicrometer scale. In this thesis the author exploited the exceptional malleability of silver and gold to extend the use...
