We see development of cultures directed from positions of logic and reason, eventually describing what makes us human. Proposed as beginning even before the accepted moment of the big bang, the cosmos erupts later over billions of years to first life in a progression of species, eventually leading to a fresh look at Homo erectus and newly thought subspecies of Neanderthal, sapiens, and modern man. Presented here are at least thirty alternatives to generally accepted myth, magic, and misclassifications in history. Man with emotions, including an underlying spirituality, combined with soul, brain, mind, genome, and body has experienced his evolution for over 600,000 years of a 13.7 billion-year existence.
