

Geological Survey Professional Paper Volume 604

Filesize: 2.83 MB

Reviews

If you need to adding benefit, a must buy book. it absolutely was writtern extremely perfectly and beneficial. You are going to like the way the blogger compose this publication.

(Orlando Abernathy)

GEOLOGICAL SURVEY PROFESSIONAL PAPER VOLUME 604

To read **Geological Survey Professional Paper Volume 604** PDF, make sure you access the button beneath and save the document or have access to other information that are have conjunction with GEOLOGICAL SURVEY PROFESSIONAL PAPER VOLUME 604 ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. Excerpt: .distributed, cut by wea thered fractures. 11. Pyroxene dacite; east fork Milk Creek; phenocrysts irregularly distributed. 12. Pyroxene dacite vitrophyre; south side Vista Creek; phenocrysts irregularly distributed. 13. Oxyhornblende-hypersthene dacite; Disappointment Peak, oxidized red. 14. Oxyhornblende-hypersthene dacite; Disappointment Peak; medium-siied sample; some diktytaxitic inclusions. 15. Vitric tuff; mouth of Glacier Creek; large sample; may contain dacite inclusions. and dikes in the Glacier Peak area sample 17. Oxldes: Weight percentages by X-ray fluorecence supplemented by methods described in U.S. Geological Survey Bulletin 1144-A Analysts: Paul L. D. Elmore, Lowell Artis, and H. Smith holocrystalline mesostasis of sodic feldspar and (or) alkalic feldspar, quartz, and scattered flakes of palebrown biotite are characteristic of these flows (figs. 35, 36). These patches appear devitrified, but as similar patches occur in flows of all ages, they may not be time dependent. Perhaps they are related to conditions during cooling, such as local accumulations of volatiles. Similar holocrystalline patches are common in the flows of Mount Rainier (C. A. Hopson, oral commun., 1965). MINERALOGY QUARTZ The ubiquitous occurrence of partially resorbed quartz crystals (fig. 37) makes a xenocrystic origin unlikely. In the lavas bearing the holocrystalline groundmass patches, resorbed quartz phenocrysts are commonly surrounded by a halo of holocrystalline material similar to the patches, which suggests that the quartz was reacting with the melt in situ. In a few flows, partially resorbed quartz is surrounded by reaction rims of small crystals of pyroxene. X-ray diffraction studies indicate cristobalite is present in the groundmass...
