## ARITHMETICAL INVESTIGATIONS

Condition: New. Publisher/Verlag: Springer, Berlin | Representation Theory, Orthogonal Polynomials, and Quantum Interpolations | In this volume the author further develops his philosophy of quantum interpolation between the real numbers and the p-adic numbers. The p-adic numbers contain the p-adic integers  $\mathbb{Z}_p$  which are the inverse limit of the finite rings  $\mathbb{Z}/p^n$ . This gives rise to a tree, and probability measures  $w$  on  $\mathbb{Z}_p$  correspond to Markov chains on this tree. From the tree structure one obtains special basis for...
