## COMPUTATIONAL INTELLIGENCE IN POWER-LINE COMMUNICATION SYSTEMS : ADVANCED METHODOLOGIES FOR CHANNEL AND NOISE ESTIMATION IN BROADBAND PLC

VDM Verlag Sep 2009, 2009. Taschenbuch. Condition: Neu. This item is printed on demand - Print on Demand Neuware - This work presents original developed methods, belonging to the soft computing area, that have been applied to solve complex signal processing problems arising in communication systems with adverse conditions. The adverse conditions are given by the fact that the considered physical channel is non-linear, non-stationary, and the noise is coloured impulsive noise. Modified vector quantization algorithms have been..
