

Exercises in Electrical and Magnetic Measurement

Filesize: 6.49 MB

Reviews

This publication is wonderful. It is amongst the most remarkable pdf i have got read. Its been written in an exceptionally basic way and it is merely after i finished reading through this pdf in which really transformed me, alter the way i really believe.

EXERCISES IN ELECTRICAL AND MAGNETIC MEASUREMENT

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1884 Excerpt: . flowing through his body? Answer. 100 milliamperes. (21.) The resistance of a Thomson s mirror galvanometer is sometimes as great as 50,000 ohms, and such an instrument will give a deflection of 200 divisions of the scale with a single Daniell s cell through a resistance of 10 megohms. Assuming the electromotive force of a Daniell cell to be 1 volt, what would be the strength of current flowing through the galvanometer? Answer. 100 of a milliampere. (22.) The same current was sent simultaneously through two tangent galvanometers A and B, producing in them the deflections 28 20 and 21 respectively. If on another occasion a current of a certain strength produce a deflection of 37 in the galvanometer A, what deflection would the same current have produced in B? When a tangent galvanometer is inserted in a circuit with the plane of its coil coinciding with that of the magnetic meridian, a current of strength, c, will produce a deflection, θ , the two being connected by the equation $c = m \tan \theta$, where m is a constant whose numerical value depends upon the construction of the particular instrument and upon the intensity of the local magnetic field. Let m_1 and m_2 be the values of the constant m for the two galvanometers A and B; then from the first experiment we have $m_1 \tan 28 20 = m_2 \tan 21$, $m_1 \tan 21 = m_2 \tan 28 20$ Let x = the number of...
