

Entomological News, Vol. 25: May, 1914 (Classic Reprint)

By Philip P Calvert

Forgotten Books. Paperback. Condition: New. This item is printed on demand. Dimensions: 9.0in. x 6.0in. x 0.1in. Excerpt from Entomological News, Vol. 25: May, 1914 No doubt every butterfly collector who ever papered a lot of desirable material on some extended collecting trip, has experienced more or less disappointment when, on spreading the specimens, those the condition of which; when taken, left nothing to be desired, have been found minus antennae, or legs, the wings rubbed, or the thorax and abdomen attenuated and distorted. The spreading of any papered specimens, too, is apt to prove more or less unsatisfactory, especially in those families having strong thoracic muscles, as the Hesperidae, since when specimens have lain in papers though for a short time, the wings often show a tendency to revert to the position held while in the papers, which cannot be entirely overcome even though the insects are kept on the spreading boards for a considerable length of time. Also insects that have been once dried and then pinned do not become as firmly fixed on the pin as if pinned when fresh. During the past two summers I have employed a method of caring for my specimens,...
