## Projective Differential Geometry of Curves and Ruled Surfaces

By Ernest Julius Wilczynski

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 edition. Excerpt: .proportional to them. We shall then find an equation of the form  $i, (utvk--ukv, ) = 0$ , also of the  $w$ th degree. By the same reasoning as above, we find that the lines of a complex of the  $n$ ih degree, which are situated in a given plane, envelop a curve of the  $n$ th class, the complex curve of the plane considered. The locus of all lines which satisfy two independent equations, homogeneous in the line coordinates, consists of  $oo2$  straight lines. It is known as a congruence. Clearly the lines common to two complexes form a congruence. But a congruence need not be the complete intersection of two complexes, just as a space curve need not be the complete intersection of two surfaces. The essential part of our definition of a congruence is that it contains  $oo2$  straight lines. The locus of  $oo1$  straight...

### Reviews

*A whole new e book with a brand new perspective. Indeed, it is enjoy, continue to an interesting and amazing literature. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Ebba Hilll**

*This ebook could be well worth a study, and superior to other. It really is basic but unexpected situations inside the 50 % of your ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

-- **Prof. Buford Ziemann**
