It aims to present, as briefly and clearly as possible, an account off the assay processes which the pharmacist may advantageously use, and which he would use frequently were he not deterred by an exaggerated idea of the difficulty of the requisite chemical manipulations. To ascertain exactly the proportion of each active constituent in a drug, or in a medicinal preparation, is often a task of great difficulty, and the professional chemist not unfrequently acknowledges himself baffled in the attempt. In fact, the chemist s idea of an assay process is so high that it is practically unattainable. Pharmaceutical assaying, however, proposes for itself aims which are practical, rather than ideal. It seeks to ascertain approximately the relative therapeutic value of different specimens of a given drug or...
