SOME RECENT RESULTS FROM THE THEORY OF NON-NEWTONIAN FLUIDS

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Exact Solutions and Energetic Balance | The main aim of this thesis is to present some new and recent results from the theory of non-Newtonian fluids. Such results refer to different motions of generalized second grade and Oldroyd-B fluids and ordinary Maxwell fluids. Generally, the constitutive equations for generalized non-Newtonian fluids are obtained from those of non-Newtonian fluids by replacing the time derivatives of an integer order by the so called Riemann-Liouville...
