

Exercises in electrical and magnetic measurement, with answers

Filesize: 7.99 MB

Reviews

This ebook is great. I am quite late in start reading this one, but better then never. I am just easily will get a satisfaction of reading through a composed pdf.

(Brendan Doyle)

EXERCISES IN ELECTRICAL AND MAGNETIC MEASUREMENT, WITH ANSWERS

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 36 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1876 edition. Excerpt: . . . galvanic cell was connected up with a tangent galvanometer and a resistance box. When the inter-polar resistance was 1-44 Ohm the deflection of the needle was 45 30, and, when an additional resistance of one Ohm was included in the circuit, the deflection was 3220. Find the internal resistance of the cell. (2.) A Bunsen cell was joined up with a tangent galvanometer of very small resistance and produced a deflection of 3330. An additional resistance of 1-39 Ohm was introduced into the circuit and the deflection fell to 8. Find the resistance of the cell, neglecting that of the galvanometer. (3.) With another Bunsen cell and the same galvanometer a deflection of 57 was obtained, and then, by means of a rheostat, a resistance of 145 Ohm was added to the circuit and the deflection fell to 38. Find the resistance of the cell, neglecting that of the galvanometer. (4.) A Groves cell was then joined up with the same galvanometer and a deflection of 30-8 was obtained. On adding a resistance of 589 Ohm the deflection fell to 137. by a subsequent experiment the joint resistance of the galvanometer and connections was found to be 0-35 Ohm. Find the resistance of this Groves cell. (5.) In testing for the internal resistance of a Leclanche cell with a tangent galvanometer of very small resistance, a deflection of 9 was observed, and on including in the circuit an additional resistance of 5 Ohms..
