Pearson Education Limited, United Kingdom, 2015. Paperback. Book Condition: New. Global ed. 255 x 203 mm. Language: English . Brand New Book. For courses in linear algebra. With traditional linear algebra texts, the course is relatively easy for students during the early stages as material is presented in a familiar, concrete setting. However, when abstract concepts are introduced, students often hit a wall. Instructors seem to agree that certain concepts (such as linear independence, spanning, subspace, vector space, and linear transformations) are not easily understood and require time to assimilate. These concepts are fundamental to the study of linear algebra, so students understanding of them is vital to mastering the subject. This text makes these concepts more accessible by introducing them early in a familiar, concrete R^n setting, developing them gradually, and returning to them throughout the text so that when they are discussed in the abstract, students are readily able to understand.
