Excerpt from Brayley s Family Medical Almanac for 1881: Free to All Scrofulous Diseases are not alone produced by impurity of the blood, but by impoverishment of the blood as well. Blood becomes thin with a great increase (if water, and a remarkable decrease of its solid elements, caused by the use of bad or insufficient food, want of fresh air, sun light, clean linen, &c. It is emphatically the common disease. The symptoms which precede the visible signs of Scrofula always indicate disorder of the digestive organs. It has been shown beyond doubt that there are certain forms of indigestion which end in Consumption, or in one or another form of Scrofula, the result being a weak, sickly, attenuated life, gradually fading into death.
