Excerpt: . . . with the expedition undertaken by the Athenian fleet against the Lacedemonians. The date answers to the second year of the eighty-seventh Olympiad, the first of the Peloponnesian war. Thucydides, who was contemporary, says the stars were seen in the middle of the day. According to Plutarch, in his Life of Pericles, the commander of the vessel was greatly alarmed at the darkness, which took place as he was on the point of setting sail; but the Athenian General was luckily able to explain the phenomenon, which he illustrated in a manner that seems to have allayed the fears of the captain, and so prevented the delay of his expedition. The total eclipse, known as that of Agathocles, which occurred on the 15th of August, B. C. 309, was also investigated by Mr. Baily. In this case neither the date nor the locality were open...
