These machines are essentially designed for the purpose of the niacroseismic observation, and the multiplication of their pointers varies between 3 and 10. .-. The time distribution of earthquakes may not necessarily be similar for the whole of Japan. Consequently I have not mixed up all the records, but constructed the tables of monthly and hourly earthquake distribution separately for the different stations. The reader is also referred to Jour. Sc. Coll., Imp. Univ., Tokyo, Vol. XI, in which I have discussed the annual variation of the seismic frequency for Japan taken as a whole, with respect to destructive and ordinary small earthquakes. 4. Meteorological Observatories. The 2 J meteorological observatories are for the sake of convenience divided into two groups (A) and...
