BookSurge Publishing. Paperback. Book Condition: New. Paperback. 628 pages. Dimensions: 10.0in. x 7.0in. x 1.4in. This book provides a new way to think about problems of general interest that permits greater comprehension than both traditional philosophy and our modern, materialistic science. Since the 1920s, philosophical materialism has been outmoded as a foundation of science, but unfortunately scientists and non-scientists continue to think with its confusing and limited concepts. The name of this philosophy is mathematical nihilism or zero-sum nihilism. It has nothing to do with Russian nihilism or any other political or ethical nihilism. It is a metaphysical doctrine that says that the multiverse is so constituted that all complete conservation laws in physics must sum to zero. Most people think that conserved quantities in physics are conserved because they are indestructible or substantial. Quite the contrary, what is conserved is conserved because it is a perfectly balanced zero-sum. Zero cannot change - it is eternally zero. That is the surprising origin of conservation laws. Thus, the use of the Latin word nihil in the name mathematical nihilism. For simplicity, throughout the book, it is often referred to as simply nihilism, although it has nihil in common with the ordinary meaning of nihilism in the Oxford English Dictionary. The theory of mathematical nihilism is used to explain why the universe is a nearly perfect vacuum, the emptiness of the atom, the emptiness of nucleons (protons and neutrons), the origin of the laws of conservation, as well as to explain why Darwin's most surprising idea that greater comes from lesser must be true, and why no philosophical or psychological monism has ever provided - and never will provide - a satisfactory account of the observables. It is easier to start reading this book from Appendix 0. The book has two halves. The first half is a fictional account of a dream I had...
