Excerpt: .it was valuable to me, and for some circumstances nothing may be better. The plan, in brief, was this: The queen being caged and left in the hive, all queen-cells are cut out in five days from the time the swarm issued, and five days later all queen-cells are again cut out and the queen set at liberty. I used this one season with great satisfaction, and I do not remember that any colony thus treated swarmed again. VARYING DOOLITTLE S PLAN. The next season I variaed the pian. Instead of leaving the queen with the colony to remain idle for ten days, I took her away and gave her to a nucleus, a new colony, or wherever a queen was needed. At the end of the ten days I returned her to the colony, placing her directly upon a comb taken from the middle of the brood-nest. Often, however, I gave them a different queen, for after an absence of ten days, I doubt if they could tell their own queen from any other. Besides, they were in a condition to take any queen without grumbling. After the first year, however, I had some colonies swarm again after the queen was given them. Whether it was the season, the change in the plan, or some other cause, I am unable to say. PUT-UP PLAN. I then adopted a plan which relieved me of the necessity of hunting for and cutting out queen-cells. No...
