## Reviews

This created ebook is wonderful. I am quite late in start reading this one, but better then never. You may like the way the author compose this pdf.

(Frederic Lang)

# AN INTRODUCTION TO THE STUDY OF THE MAYA HIEROGLYPHS VOLUME 57

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 120 pages. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1915 Excerpt: . . . division next higher. 2 Various methods and tables have been devised to avoid the necessity of reducing the higher terms of Maya numbers to units of the first order. Of the former, that suggested by Mr. Bowditch (1910: pp. 302309) is probably the most serviceable. Of the tables Mr. Goodmans Archjeic Annual Calendar and Archseic Chronological Calendar (1897) are by far the best. By using either of the above the necessity of reducing the higher terms to units of the first order is obviated. On the other hand, the processes by means of which this is-achieved in each case are far more complicated and less easy of comprehension than those of the method followed in this book, a method which from its simplicity might be termed perhaps the logical way, since it reduces all quantities to a primary unit, which is the same as the primary unit of the Maya calendar. This method was first devised by Prof. Ernst Torstemann, and has the advantage of being the most readily understood by the beginner, sufficient reason for its use in this book. Table XIII. VALUES OF HIGHER Table XIV. VALUES OF HIGHER PERIODS IN TERMS OF LOWEST, PERIODS IN TERMS OF LOWEST, IN INSCRIPTIONS IN CODICES 1 great cycle 1 2, 880, 000 1 unit of the 6th place2, 880, 000 1 unit of the 5th place 144, 000 1 unit of the 4th place 7, 200 1 unit of the 3d place 600 1 unit of the 2d place 20 1...
