Enhancement Of Bioh2 Production Via In-situ Catalytic Adsorption(ica)

By Yusup, Suzana / Khan, Zakir

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Optimization and Kinetic Studies | Hydrogen production from biomass such as palm oil wastes is an attractive option due to its abundance in country such as Malaysia. Biomass thermal conversion processes such as biomass steam gasification with in-situ CO2 adsorption shows a great potential for renewable hydrogen production. Limited research focused on the utilization of palm waste material in steam gasification. The coverage is not limited to the design of fluidized bed but also touches on the unit performance, heat and mass transfer aspects of fluidized bed. In addition, design of experiment (DOE) is performed using Response Surface Methodology (RSM) in conjunction with Central Composite Rotatable Design (CCRD) using the Expert Design Version 8 software. The kinetic parameter evaluation of different chemical reactions i.e. char gasification, methanation, boudouard, methane steam reforming, water gas shift and carbonation reactions in ICA steam gasification is discussed. The book serves as reference materials for students, engineers and scientists working in the area of hydrogen production and biomass gasification. | Format: Paperback | Language/Sprache: english | 244 pp.

Reviews

The ebook is simple in go through better to fully grasp. It is actually rally exciting throgh reading through period. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- ***Alexander Jacobi***

A really great publication with perfect and lucid explanations. Of course, it is play, continue to an amazing and interesting literature. I discovered this book from my i and dad suggested this publication to find out.
